WALTER WHITE

## GRAPE ABDUCTION COMPANY

From far off in space, we observed your little blue and green planet, spinning around your great yellow sun at unimaginable speeds – well, at least they are unimaginable to you. And we realized that there was one special place on this planet with the perfect conditions to grow wine fit for the tastes of space: Stajerska, Slovenia.

Grapes as diverse as Pinot Blanc, Pinot Noir, Pinot Grigio, Riesling, and even the hard-to-pronounce ones (we're looking at you, Žametna Črnina) thrive in the harsh environment of these rocky hills. Made entirely by ... erm, hand... and treated with the highest degrees of technology and care, we have created three wines that truly give you the taste of the cosmos. Space juice, if you will.

And if you ever found yourself gazing up the sky and asking: do aliens make wine? Now, you have your answer.
