1/2 oz White Pineau des Charentes  
1/2 oz Red Vermouth  
5 dash Angostura Bitter  
5 dash Orange Bitter  
Glassware, Old Fashioned

## RÉSIDENCE SPIRITS

ORGANIC GIN

### Taste profile

**Eye:** A crystalline color which can reveal a light veil at low temperature.

**Nose:** Fruity, round, and spicy attack, followed by heart notes of fresh slightly resinous juniper berries, orange blossom, bergamot, and a touch of angelica root. The final notes of nutmeg, cloves and Timut pepper.

**Palate:** The attack is silky, warm, very rich. This is followed by a generous bouquet of candied oranges mixing citrus zest and delicate spices found on the nose with base notes and a hint of cinnamon. A superior taste that's kind to the Earth!

### Product features & benefits

No filtration process enhancing the natural aromas and flavors of the organic botanicals. Blended with expertise to create a very well balanced and pleasant distilled gin. Adaptable to many tonics and chasers on the market. A perfect base for any gin cocktail.

### What's your occasion?

Enjoy RÉSIDENCE Distilled Gin in a classic G&T, a Negroni or any of your favorite Gin cocktails. RÉSIDENCE signature cocktail created by Luciole Barin Cognac, France.

**RÉSIDENCE GIN** is a distilled gin (everything is distilled separately), which is different from a London dry (mixing all ingredients in the same basket).

### There are two large distillates:

\*Juniper which is the base of the gin, very present on the market. By definition, there is a base of 50% juniper. This one is mainly Italian and gradually French (25%). Distilled at 75% alcohol, which is the rate that allows to preserve the aromas.

\*Bergamot (from Corsica) at 81%. Only the skin is used; it is harvested and dried on site.

The alcohol is a French organic grain alcohol (wheat): it is neutral. The third and fourth botanicals are elderberry and elderflower. The others are a "secret" but we can say that they give notes of citrus.
