**Total acidity:** 5,28 g/L

**Free S02 level:** 8 mg/L

**PH:** 3,46

**Total S02 level:** 34 mg/L

**Sugar residue level:** 1,8 g/L

**Malolactic fermentation:** Yes

## Tasting notes

Two wine dudes sipping wine with the ocean between them came up with the idea to make an awesome easy drinking skin contact pet-nat.

Delicate orange zest and cinnamon flavors combined with tropical fruits slowly move into the nutty, yeasty flavors to a round and deep finish. Rich and creamy texture as a result of skin contact and malolactic fermentation with wild bubbles on top of that make a perfect combination to pair with wild trout tartare, foie gras with fig jam, and of course, hard cheeses.
